

- 1. Judgments of spoken discourse and impression formation of neurotypical and autistic adults** *Geelhand, P., Papastamou, F. & Kissine, M.*
- 2. Phonetic alignment in semi-naturalistic conversations** *Belenger, M., Dumont, C. & Kissine, M.*
- 3. Using natural language samples with autistic children with limited spoken language abilities to characterize and evaluate response to intervention** *MacDonald-Prégent, A., Saiyed, F., Hyde, K., Sharda, M. & Nadiq, A.*
- 4. Speech characteristics predict social competence in non-autistic, but not autistic children** *Scheerer, N., Janes, A., McClay, E., Gurm, M., Boucher, T.Q., Yeung, H., Iarocci, G.*
- 5. The interface between autism and bilingualism: A study of language skills** *Meir, N. & Novogrodsky, R.*
- 6. Lexical semantics and linguistic profiles of Hebrew speaking children with ASD** *Sukenik, N., Friedmann, N. & Tuller, L.*
- 7. Atypical features of ASD children's prosody correlate with acoustic startle measures** *Mazuka, R., Takahasi, H., Kondo, A., Saikachi, Y. & Kamio, Y.*
- 8. The LACA baseline battery for the evaluation of language and nonlinguistic cognition in individuals with ASD** *Prevost, P., Tuller, L., Schaeffer, J., et al.*
- 9. Influence of investigator's use of "um" on verbally fluent children on the autism spectrum and/or with ADHD** *Boo, C., McIntyre, N., Mundy, P. & Naigles, L.*
- 10. Relationships among pragmatic language and externalizing behaviors in autism** *Crutcher, J., Butler, E., Burke, J.D., Fein, D.A., Eigsti, I.M.*
- 11. Frequency of verbal and nonverbal backchannels by older children on the autism spectrum** *Matthewman, H., Zane, E. & Grossman, R.B.*
- 12. Developmental trajectories of social vocal engagement as biomarkers for autism during the first two years** *Kumareswaran, M., Edwards, M., Klaiman, C., White, S., Lewis, M., Brane, N., Ghai, S., Ramsay, G.*
- 13. Speech ability affects expressive language in minimally verbal autistic children: Remote replication of in-person findings** *Chenausky, K., Tager-Flusberg, H. & Green, J.*
- 14. Piloting an evidence-based, parent-mediated intervention for Spanish speaking Latinx families** *Guerra, K., Pickard, K. & Hendrix, N.*
- 15. Males and females perceive non-speech vocalizations by minimally-speaking individuals differently** *Johnson, K.T., O'Brien, A.M., Radhakrishnan, S., Kershenbaum, A., Picard, R.W.*
- 16. Word meanings are complex: Implications for communication differences in autistic individuals** *Cuneo, N., Floyd, S. & Goldberg, A.E.*
- 17. Autistic and neurotypical speakers mark given-new information structure with systematic, perceptible prosodic focus** *Syrett, K., Trivedi, N., Butler, C. & Kahng, S.*
- 18. Receptive language skills are positively associated with school-age pragmatic skills in infants later diagnosed with autism** *Ravi, S., Moraglia, L.E., Abdi, H., Meera, S.S., Parish-Morris, J., Yankowitz, L., Estes, A., Zwaigenbaum, L., Dager, S.R., Burrow*
- 19. Timing and quality of response to conversational bids in autistic, loss of ASD diagnosis, and neurotypical individuals** *Taverna, E., Stabile, M.J., Thomas, R.P., Patel, K., Birmingham, M., Larson, C., Mohan, A. & Eigsti, I.M.*
- 20. Exploring pragmatic error profiles of autistic and non-autistic women** *Hannah, K.E., McRae, K. & Stevenson, R.A.*

21. **A linguistic analysis of autistic and non-autistic adult women's productions: Written narratives of emotional autobiographical memories** *Merken, F. & Geelhand, P.*
22. **Do personal interests support word learning? A study with autistic and non-spectrum children** *Luyster, R., Steele, A., Pelletier, T. & Arunachalam, S.*
23. **Parent reported attention and language in infants at elevated likelihood for ASD** *Federico, A., Platt, E. & Bradshaw, J.*
24. **Links between grammatical error patterns and executive functioning skills among bilingual (English/Spanish) children with autism** *Vanegas, S.B., Panjwani, H. & Nelson, N.*
25. **Exploring motor speech disorders in low and minimally verbal autistic individuals: An auditory-perceptual analysis** *Maffei, M., Chenausky, K., Haenssler, A., Abbiati, C., Tager-Flusberg, H. & Green J.*
26. **Caregiver report of social-communication development: Associations with autism likelihood status and social stress** *Djiko, T. & Bradshaw, J.*
27. **Mandarin-acquiring children with ASD use syntax to learn verb meaning** *Su, J., Naigles, L.R. & Su, Y.E.*
28. **The developmental trajectory of spontaneous object imitation in the second year of life and its relation to later language development in autism** *Reetzke, R., Herman, D. & Landa, R.*
29. **Shared language features and individual differences of autistic adults with conversational level spoken language** *Williams, D.L. & Zambruno, O.*
30. **Pragmatic development in adolescents and young adults with and without autism spectrum disorder as measured by the Test of Pragmatics of Japanese for Children** *Mizutani, R., Oi, M., Fuduka, J., Hiratan, M.*
31. **Word learning and retention from overhearing as a resilience factor for vocabulary acquisition in autistic children** *Hu, A. & Qi, Z.*
32. **Selection, classification, and analysis of acoustic features from Italian-speaking children with autism spectrum disorder** *Beccaria, F., Gagliardi, G. & Kokkinakis, D.*
33. **Mentalizing matters for autistic and non-autistic adults' comprehension of indirect requests** *Frost, F., Zane, E., Nagano, M. & Timler, G.*
34. **Patterns of maternal communicative behaviors among low-income Chinese immigrant mothers of children with autism** *Xu, Y., Chen, F., Liu, X., Qiu, C.R., Wu, Z., Mirza, M. & Magaña, S.*
35. **Exploring the morphological and morpho-syntactic abilities of adolescents with and without autism spectrum disorders** *Lotsky, I., Reznick, J. & Sukenik, N.*
36. **Toddler language outcomes in autism are associated with differing infant mouth-looking trajectories and stimuli feature sensitivity to infant-directed speech and song** *Sahoo, M., Alviar, C., Edwards, L., Jones, W., Klin, A. & Lense, M.*
37. **The syntactic properties of the early vocabulary of children on the autism spectrum** *Artis, J., Diagana, S. & Arunachalam, S.*
38. **Autistic teenagers lexically align at similar rates to typically developing peers** *Corrigan, G. Carmona, J., Fusaroli, R., Weed, E., Fein, D. & Naigles, L.*
39. **The stability and validity of automated indices of vocal development in infants at high- and low-risk for autism** *Markfeld, J., Feldman, J.I., Daly, C., Santapuram, P., Bowman, S.M., Dunham, K., DiCarlo, G., Suzman, E., Keceli-Kaysili, B. & Woynaroski, T.*
40. **Quantitative and qualitative analyses of preverbal production of infants with high-likelihood of ASD at 6 and 18 months: How speech-like they really sound?** *Weyland, M., Maes, P., Delvaux, V., Kissine, M.*
41. **Characterizing vocal and verbal stereotypies in autistic children who were minimally verbal at preschool** *Maes, P., Busson, B. & Kissine, M.*

42. Caregiver language input to minimally verbal and verbal 4-7-year-old autistic children *Butler, L.K & Tager-Flusberg, H.*
46. Associations of early vocalization features with autism symptomatology in children with Angelman Syndrome *Hamrick, L., Seidl, A. & Kelleher, B.*
47. Early verb production in autism spectrum disorder (ASD) *LeGrand, K.J., Parish-Morris, J., Naigles, L.*
49. Beyond the toddler years: A meta-analysis of communicative abilities in siblings of children with autism spectrum disorder *Britsch, E.R.*
50. Minimally and low verbal adolescents with ASD do not show early neural salience detection response to one's own name when heard in a multi-speaker scene *Schwartz, S., Shinn-Cunningham, B. & Tager-Flusberg, H.*
52. Developmental trajectories in children at-risk for ASD based on early language delays *Thompson, L., Farmer, C., Manwaring, S. & Thurm, A.*
53. Parental use of generics in joint attention episodes *Tecoulesco, L., Lame, J., Carmona, J.D. & Naigles, L.R.*
54. Remote methods for assessing receptive language in infancy – comparison of looking-while-listening and parent-report *Stone, C., Arunachalam, S., Luyster, R., et al.*
55. Conventional and spatial uses of prepositions in and on in autism *Bockynska, A.\* , Zane, E.R.\* & Eigsti, I.M.*
56. Latent class analysis of school-based intervention services among autistic children with and without a co-occurring language delay/disorder *Zajic, M.C., Gudknecht, J. & McIntyre, N.S.*
57. Identification of ambiguous pronouns during narrative comprehension by older autistic children *Zane, E., Nagano, M. & Grossman, R.B.*
58. Language assessment in toddlers with ASD: Can measures derived from natural language samples replace scores from standardized tests and parent reports? *La Valle, C., Barokova, M., Raymond, L., Johnston, E., Krol, M., Leano, J. & Tager-Flusberg, H.*
59. Low-Verbal Investigatory Survey (LVIS) – Evaluating the validity of a novel measure of communicative competence in minimally verbal autistic children *Naples, A., Tenenbaum, E. & Eigsti, I.M.*
60. Morphosyntax in autistic young adults with and without language impairment *Girolamo, T., Larson, C. & Eigsti, I.M.*
61. Sensory sensitivity scores predict responses to perturbations of vocal pitch in noisy environments in autistic and non-autistic adults *Scheerer, N., Ly, V., Boucher, T.Q., Jones, J.A. & Iarocci, G.*
62. Autistic group differences in social attention are magnified by real-world perceptual load and linguistic features *Haskins, A.J., Mentch, J., Botch, T.L., Garcia, B.D., Burrows, A.L. & Robertson, C.E.*
63. Categorical perception in autistic adults: The who and the how matter *O'Brien, A.M., Ozernov-Palchik, O., D'Mello, A.M., Sinha, P. & Gabrieli, J.D.E*
64. Auditory processing skills associated with expressive and receptive language abilities in children and adolescents with autism *Skiba, S.A. & Demopoulos, C.*
65. Characterizing maternal communicative behaviors in mothers of young children with autism and developmental delays in low-resource households *Vanegas, S.B., Davila, M., Hopp, L., Valdes, J.D., Martinez, C.*
66. Profiles of autistic adults with a significant early interest in reading *Crutcher, J. Saltzman, D., Hernandez, B., Heffner, C., Magnuson, J.S. & Eigsti, I.M.*
67. A systematic review of language-related functional connectivity in ASD *Thomas, H.R., Larson, C., Crutcher, J., Stevens, M.C. & Eigsti, I.M.*
68. Characteristics of early vocabulary in infants at elevated and low likelihood for ASD *Vinyard, A., Bradshaw, J.*
69. Disfluency use as a window to pragmatic language competence in bilingual children with and without autistic spectrum disorders *Beradze, M. & Meir, N.*

- 71. Early screening of language delays in infants at an elevated likelihood for autism spectrum disorder** *Platt, E. & Bradshaw, J.*
- 72. Lexical abilities of children with and without autism in the context of the Arabic diglossia: Evidence from naming and narrative tasks** *Abd El-Raziq, M., Meir, N. & Saiegh-Haddad, E.*
- 73. Language abilities of unaffected siblings of youth with ASD are lower in comparison to typically developing controls as revealed with CELF** *Arutiunian, V., Santhosh, M., Corrigan, S., Pelphrey, K., Webb, S.J.*
- 74. Receptive language profiles in minimally verbal autistic children and adolescents** *Chen, Y., Siles, B., Liberti, G. & Tager-Flusberg, H.*
- 75. Autism screening results in children with communication delays from a state funded early intervention system** *Dooley, G., Barber, A., Vick, M.B., Pittard, W., Hackney, L., Hilty, T. & O'Kelley, S.*
- 76. Different paths to bilingualism in autism spectrum disorder (ASD): Natural and unexpected** *Hindi, I. & Meir, N.*
- 77. Anxiety symptoms predict concurrent pragmatic language skills in young autistic children** *Hogan, A.L., Paterra, V., Parks, E., Coyle, R., Jarvis, K. & Roberts, J.*
- 78. Analysis of potential predictors of language in toddlers with Autism Spectrum Disorders: A comprehensive approach** *Jones, A., Garcia-Alday, K., Choi, A. & Faja, S.*
- 79. Validating the Early Communication Indicator – Autism (ECI-A) to measure communication in young children on the autism spectrum** *Steinbrenner, J.R., Nowell, S., Buzhardt, J.F., Wallisch, A., Salley, B., Watson, L. & Boyd, B.*
- 81. Gesture comprehension and core cognitive processes in autism spectrum disorder** *Canale, R., Canfield, A.R., Castelluccio, B., Larson, C. & Eigsti, I.M.*
- 82. Repetition and handshape intrusion in the fluent signing of an autistic, deaf adolescent** *Walker, K., Singleton, J.L., Meier, R.P. & Shield, A.*
- 83. No advantage of pragmatic inference for vocabulary retention in children with autism** *Trice, K., Papafragou, A. & Qi, Z.*
- 84. Sex differences in autistic children's conversational turn-taking** *Cho, S. Cola, M., Knox, A. Pallela, M.R., Russell, A., Hauptmann, A., Covello, M., Cieri, C., Liberman, M., Schultz R.T. & Parish-Morris, J.*
- 85. The role of structural language in social-emotional, educational, and vocational outcomes in autism spectrum disorder and loss of autism diagnosis** *Larson, C., Mohan, A., Taverna, E., Girolamo, T., Fein, D. & Eigsti, I.*
- 86. Using Autism Quotient scores to predict second language phonetic trait imitation ability** *Dunlap, M.*
- 87. Parental tuning of narratives directed to autistic and non-autistic children: An exploratory eye-tracking study** *Shukla, V., He, A.X. & Arunachalam, S.*
- 88. The relationship between phonological development and motor skills in autistic children** *Shen, L., Butler, L.K., Chenausky, K. & Tager-Flusberg, H.*
- 89. Sensitivity and insensitivity to timbral and tonal structure underlying speech and melody - Theoretical implications for language performance of individuals with ASD** *Minematsu, N. & Nishimura, T.*
- 90. Socioeconomic status and early vocal development: Typical development vs. ASD** *Ramsay, G., Edwards, M., Lewis, M., Brane, N., White, S., Klaiman, C.*
- 91. Language Development is Associated with Sensory Responsiveness in Infants at Risk for Autism** *Dunham, K., Feldman, J.I., Raj, S., Augustine, A.E., Bowman, S.M., Daly, C., Garla, V., Golden, A.J., Santapuram, P., Suzman, E., Cascio, C.J., Williams, K.L., Kirby, A.V., Keceli-Kaysili, B. & Woynaroski, T.G.*
- 92. Sensorimotor functioning in autism: Sound-to-image mapping in autistic, loss of ASD diagnosis, and neurotypical individuals** *Stabile, M. & Eigsti, I.M.*
- 93. Augmentative and alternative communication systems for nonspeaking autistic children: Do location-centered layouts improve learning?** *MacDonald-Prégent, A. & Nadig, A.*
